Marking Criteria (20-Point Scale)

Criterion	1–4 (70% +)	5–8 (60–69%)	9–12 (50–59%)	13–16 (40–49%)
1. Report and Technical Explanation (35%)	Excellent clarity and depth; well-justified design and method; clear understanding.	Thorough explanation with good justification; mostly clear structure.	Adequate explanation; justification limited but present.	Weak discussion with little justification.
2. Software Functionality and Implementation (40%)	Fully functional; all features implemented correctly; smooth operation.	Most features functional; minor issues.	Basic requirements met; some errors or missing features.	Partially functional; lacks completeness.
3. Code Quality and Structure (15%)	Clean, modular, well-commented code; efficient and readable.	Good structure and readability.	Acceptable structure; some inefficiencies.	Limited structure; poor commenting.
4. Analytical Insights and Recommendations (10%)	Strong analytical reasoning; clear insights and recommendations.	Good insights; clear interpretation of data.	Basic description with limited analysis.	Minimal insight or unclear recommendations.

Total (out of 100)

Tier Guidance

Tier	Implementation Scope	Typical Grade Range
Tier 1 – Pass/Merit	One complete domain dashboard with all core features.	50–69%

Tier	Implementation Scope	Typical Grade Range
Tier 2 – Merit/Distinction	Two domains implemented with integration and good structure.	70–84%
Tier 3 – High Distinction	Three domains implemented with advanced integration and polish.	85–100%
